# ORAL IMPLANTOLOGY FELLOWSHIP

The course facilitates the students' knowledge acquisition from the historical perspective to the latest advancements in Implant dentistry. It enhances their diagnostic, surgical, and restorative skills to establish optimal function and aesthetics, improving patients' overall well-being.

- First to affiliate with ICOI ◀
- Dual Certification ◀
- Personalised Guidance ◀
- Flexible, Customisable Learning for Dentists ◀

**Prof. Dr. Abdul Rashid Bin Ismail**  
Dean of Faculty of Dentistry, MUCM

- DDPH RCS (Royal College of Surgeons, England)
- MSc (DPH) (London)
- FICD (Fellowship in the International College of Dentists)
- ICOI Ambassador (International Congress of Oral Implantologists, USA)

*The Faculty of Dentistry at MUCM is dedicated to providing high-quality education and hands-on training in dentistry. We've set up a leading Centre of Excellence for Oral Implantology, Laser Dentistry, and Aesthetic Science. Numerous students have successfully completed our one-year programme with guidance from experienced Oral Implantologists. We warmly welcome aspiring dentists to join our Fellowship in Oral Implantology, offered in partnership with the International Congress of Oral Implantologists.*

# LEARNING OUTCOMES

- Apply theoretical knowledge of implant procedures and complications in clinical settings
- Work collaboratively with specialists for comprehensive implant-based patient care
- Evaluate new ideas and stay updated on advancements in Oral Implantology
- Perform implant surgical procedures confidently

## COURSE CONTENTS

### MODULE 1

#### FOUNDATION IN ORAL IMPLANTOLOGY

We will cover oral implantology basics, including conventional and digital implantology, from the past, present, and future.

### MODULE 2

#### SURGICAL ASPECTS IN ORAL IMPLANTOLOGY

We will cover the armamentarium, preparation, and surgical protocol for a successful dental implant treatment for our patient.

### MODULE 3

#### PROSTHETIC ASPECTS IN ORAL IMPLANTOLOGY

We will cover conventional, digital workflow and requirements to restore a dental implant successfully.

### MODULE 4

#### ADVANCED SURGERIES AND DIGITALIZATION IN IMPLANT DENTISTRY

We will cover some more advanced surgical procedures such as sinus lifting, ridge split and osseodensification.

**INTAKE**  
MARCH 2026
